About Me

Computer Science (Data Science) student passionate about Machine Learning, Large Language Models (LLMs), and intelligent systems. Experienced in developing end-to-end ML pipelines, Retrieval-Augmented Generation (RAG) applications, and multi-agent AI systems. Seeking AI/ML internship opportunities to contribute to real-world AI solutions.

Education

2023–Present	Rise Krishna Sai Prakasam Group of Institutions B.Tech in Computer Science and Engineering (Data Science)	CGPA: 8.18
2021–2023	Chaitanya Junior College MPC Track	Intermediate
2020–2021	Andhra Pradesh Secondary Education Board	Class X

Projects

Amazon Delivery Delay Risk Prediction Dashboard

Machine Learning

- Built a production ML pipeline on 100K+ Amazon delivery records using XGBoost (0.91 ROC-AUC) with SHAP explainability.
- Developed a Streamlit dashboard for real-time delivery delay prediction and analytics.
- **Tech:** Python, XGBoost, SHAP, Streamlit, Plotly, Scikit-learn.

Secure RAG Contract Risk Analyzer

Generative AI

- Developed a secure AI legal assistant using Retrieval-Augmented Generation (RAG).
- Implemented prompt injection protection, hallucination prevention, and automated clause risk scoring.
- **Tech:** FastAPI, ChromaDB, Groq LLM, Sentence Transformers, Docker.

AI Hiring Pipeline Simulator

Multi-Agent AI

- Built a multi-agent hiring workflow using 10 specialized AI agents.
- Implemented weighted voting for Hire/No-Hire recommendations.
- **Tech:** LangGraph, FastAPI, PostgreSQL, ChromaDB, OpenAI.

Smart Grid Electricity Theft Detection

Machine Learning

- Created a benchmark dataset containing over 560K electricity records using a custom theft generator.
- Random Forest achieved 94.71% accuracy, outperforming baseline models.
- **Tech:** Python, Scikit-learn, Pandas, NumPy, Streamlit.

Certificates

[View All Certificates](#)

- Artificial Intelligence Fundamentals – IBM SkillsBuild
- Cracking Coding Interviews – ExcelR
- Social Network Analysis – NPTEL

Skills

Programming	Python, SQL
Machine Learning	Scikit-learn, TensorFlow, PyTorch, XGBoost
Artificial Intelligence	Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering
Frameworks & Tools	FastAPI, Streamlit, Docker, ChromaDB, Git, GitHub
Data Science	Pandas, NumPy, Feature Engineering, Data Preprocessing, Data Visualization, SHAP, Plotly
Core Subjects	Data Structures & Algorithms, DBMS, Object-Oriented Programming (OOP)

References and complete project documentation are available on request.
